1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-39, drawn to a developing apparatus and method using a developer carrier opposed to an image carrier wherein an electric field for transporting a magnetic developer material has a specific value, classified in class 399, subclass 270.
- II. Claims 40-75, drawn to a developing apparatus and method using a developer carrier opposed to an image carrier wherein a magnetic developer material has a certain velocity with an predetermined bias, classified in class 399, subclass 267.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the electric field relation in invention I has separate utility such as being used without the velocity relation of invention II. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
